

HUMANITIES+

# Get an Edge

Humanities+ is a range of enriched learning and professionally relevant experiences to help you achieve lifelong success. These can be internships, professional clubs on campus, studies abroad, etc.

## THE FACTS

There are “only two choices” for graduates who want a lot of options: “to be a **technically savvy liberal arts major** or a liberally educated technical graduate.”  
*(Phil Gardner, Director of CERL, MSU)*

Humanities students can **double their chances of employment** by learning technical skills:

- IT networking
- Sales
- Programming
- Data analysis
- Marketing
- Graphic design
- General business
- Social media

Students can gain these skills through training, coursework, and internships.

91% of surveyed employers said students should have **one or two three-month internships** completed when applying for work. 82% hire interns for full-time positions.

Besides internships, employers endorse **educational practices that involve active work**, including collaborative problem solving, research, senior projects, and community engagements.

+HUMANITIES

# Get an Edge

+Humanities is an opportunity for students to supplement their technical degrees with a liberal arts education and gain a competitive advantage in the job market.

## THE FACTS

There are “only two choices” for graduates who want a lot of options: “to be a technically savvy liberal arts major or a **liberally educated technical graduate.**”  
*(Phil Gardner, Director of CERI, MSU)*

The **highest salaries** apply to positions that require liberal education capabilities:

- Writing
- Inductive and deductive reasoning
- Judgment and decision making
- Problem solving
- Social / Interpersonal skills
- Originality

Language is one of the **top 10 most useful degrees**, beating both business and economics in likelihood of employment and higher earnings. In fact, humanities graduates are more widely distributed throughout the economic sectors than any other discipline.

Liberal arts colleges produce nearly **twice as many doctorates in science** as other institutions per capita, with humanities majors scoring higher on the GMAT than business majors between 2000 and 2009.
